Have you heard about the problem of disappearing honeybees?
Why are honeybees important to fruit and many other crops?

Where Have the Honeybees Gone?

Honeybees have been disappearing around the world for several years now. In the United States, billions of bees have already died. Europe, Australia, and Brazil have also reported losses of honeybees. This is a serious problem because bees pollinate* crops. Without pollination, apple, orange, and other fruit trees cannot produce fruit. Other crops like nuts also need pollination. In the United States, one-third of the food supply depends on honeybees.

Scientists have a name for this problem: colony collapse disorder (CCD). Bees live in colonies or hives, and thousands of beekeepers have been finding their hives empty. A hive that once held 50,000 bees may just have a few dead or dying ones left.

There are many theories about why this has happened; for example, disease, pests,** unnatural growing conditions, and damaged DNA.*** But so far, scientists have still not identified one cause. They need to do more research to find a solution to this very serious problem.

1. Honeybees have stopped disappearing. T F
2. Scientists expect that more bees will die. T F
3. Apples and other fruits depend on honeybees. T F
4. Bee hives have been disappearing. T F

<thead>
<tr>
<th>4-8 Past Perfect</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Situation:</strong></td>
</tr>
<tr>
<td>Jack left his apartment at 2:00. Sue arrived at his apartment at 2:15 and knocked on the door.</td>
</tr>
<tr>
<td><strong>The past perfect</strong> is used when the speaker is talking about two different events at two different times in the past; one event ends before the second event happens.</td>
</tr>
<tr>
<td>In (a): There are two events, and both happened in the past: Jack left his apartment. Sue arrived at his apartment.</td>
</tr>
<tr>
<td>To show the time relationship between the two events, we use the past perfect (had left) to say that the first event (Jack leaving his apartment) was completed before the second event (Sue arriving at his apartment) occurred.</td>
</tr>
</tbody>
</table>

---

| **(b) Jack had left** his apartment when Sue arrived. |
| **FORM:** had = past participle |
| **(c) He’d left.** He’d left. They’d left. Etc. |
| **CONTRACTION:** I / you / she / he / it / we / they + ’d |
| **(d) Jack had left before** Sue arrived. |
| **(e)** Jack **left before** Sue arrived. |
| **(f) Sue arrived after** Jack had left. |
| **(g) Sue arrived after** Jack left. |

When **before** and **after** are used in a sentence, the time relationship is already clear so the past perfect is often not necessary. The simple past may be used, as in (e) and (g).

Examples (d) and (e) have the same meaning. Examples (f) and (g) have the same meaning.

(h) Stella was alone in a strange city. She walked down the avenue slowly, looking in shop windows. Suddenly, she turned her head and looked behind her. Someone had called her name.
